TrueConvos LLC

CAPABILITY STATEMENT

Senior DevOps Support for Federal Cloud Delivery

AWS automation | Container operations | Production support

CORE CAPABILITIES

Cloud operations

Deploy and support AWS infrastructure and containerized production workloads.

Infrastructure automation

Provision infrastructure with Terraform and automate configuration with Ansible.

Container platforms

Build Docker images and maintain Kubernetes workloads and Helm deployments.

CI/CD pipelines

Maintain GitLab and Jenkins pipelines for application builds, testing, and deployment.

Monitoring and production support

Configure New Relic alerts, troubleshoot production incidents, and maintain runbooks.

Security operations

Automate patching, integrate pipeline vulnerability checks, and support security incident management.

VA PAST PERFORMANCE

Department of Veterans Affairs

Prime contractor: Peraton
Subcontractor | 2022-present
One senior engineering seat

Work delivered
Containerized production support, production incident response, and security incident management.

Concrete result
Automated security patching across 22 servers in six environments, saving five days per patch cycle.

DIFFERENTIATORS

VA Public Trust

Active for key personnel.

4 years

Continuous VA delivery with no gaps.

Staffing capacity

One seat immediately; up to three total within 30-60 days.
